

Floating Pond Fish Dome

QI004664

Please read and retain these instructions for future reference

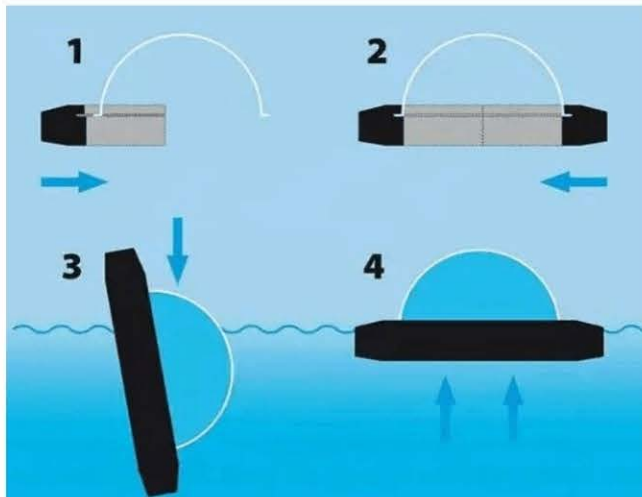

More and more, people consider pond fish as social pets and interaction goes much further than just throwing a handful of feed into the pond and observing the fish. Watching your fish becomes a unique experience with this floating transparent ball in the pond. The fish come and take a peek in the ball regularly, and that produces fantastic images.

In the beginning, you should get the fish interested in the new toy by putting feed into the ball from below. After a while, they will include the ball in their daily route. Close observation is also an ideal way of checking that your fish are healthy.

The transparent ball can be cleaned with soapy water. During winter time, at temperatures below 0°C you should remove the Floating Fish Dome from the pond. Clean all parts and store it in a dry.

ASSEMBLY INSTRUCTIONS / INSTRUCTIONS FOR USE:

Unpack the components carefully. Please check all parts have been removed from the packaging.

Parts:

- 1x 30cm dia clear sky dome
- 2x polyfoam ,assembled into 1 circle

Connect parts as shown in the diagram

1. Insert the transparent dome into the half floating ring, and then another half floating ring insert into the transparent dome.

2 . Now place the Floating Fish Dome in the pond. Press the floating ring sideways under water so that the dome is filled with pond water and any air is pushed out. Turn the dome upright below the water and let it float.

Tip: If you put food in the dome, you will lure your pond fish into the dome. Once the fish have become accustomed to the fish dome, they are very easy to observe. The magnifying glass effect makes the pond inhabitants appear larger. Ø 30 cm.
